

Coastal Technologies, Inc. USA Announces Sales and Project Managers for Expanding Worldwide Market

CTI Admin - Tuesday, October 28, 2014

Hampton, SC—Coastal Technologies, Inc. USA (CTI), a worldwide provider of high-quality industrial mist eliminators, coalescers, and separation solutions, is pleased to announce the appointment of John Louis Peebles III as a Sales and Project Management professional dedicated to the expanding global market.

Peebles joined CTI in April 2014, bringing almost 25 years of multinational engineering and management experience. He began his career with Westinghouse Electric working nationally before progressing with Westinghouse to Saudi Arabia with ISCOA Industries & Maintenance, Ltd. Peebles' next move was to Singapore as Managing Director with Westinghouse Industry Service Asia Pte Ltd (WISAPL). Most recently, while located at facilities in Munich and Bristol, he was Vice President International for Baldor Electric with responsibility for all worldwide sales and production outside of North America. Peebles has won numerous commendations for his outstanding success in Europe, the Middle East, and Asia.

"Louis is a remarkable fit for our division offering mist eliminator and separator products to industry worldwide," remarked Harry Wechsler, CTI President. "He has many years of experience in Asia and is well versed in the culture, economy, and needs of our clients. We are very excited."

Coastal Technologies, Inc. is a midsize engineering design and fabrication facility. Two-thirds of Coastal's sales are shipped out of the United States. Its founders and personnel are ingenious, committed to quality, and loyal. Many employees have been with the company since its founding in 1986. CTI is ISO 9001:2008 registered; among the many industry recognitions it has received is the US Department of Commerce's Export Achievement Certificate for accomplishments in the global market.

Coastal's primary products are mist eliminators, retainer frames, and housings that can be conformed to best respond to customers' applications and processes. Coastal recognizes that pollution from industrial processes is a major threat to air quality in industrialized areas worldwide. Additionally, the company acknowledges that ineffective process separation and equipment can be a huge profit loss. With these facts in mind, Coastal works closely with clients to solve these issues.

Norman Mansson, Vice President of Sales and Marketing, remarked that "Louis, who is equally happy to be addressed as John, combines his professionalism and passion with a laid-back, easygoing demeanor that makes it easy for him to connect with anyone. We think everyone who comes into contact with him will agree!"

Coastal is entering an exciting time in its history with not only the appointment of Peeples but also the recent addition of a new and experienced Office Manager, Kathy Scoggins, and a Special Projects guru, Christine Seabrook. We thank all of our customers for their continued support, and we look forward to continuing our relationship with you.

Please feel free to contact any member of Coastal's senior management team with questions or concerns:

Harry Wechsler, President and Owner
Norman Mansson, Vice President and Owner
John Louis Peeples III, Sales and Project Management
Dave Gillan, Engineering and Quality Control
